URSI General Assemblies

The General Assemblies and Scientific Symposia of URSI are held at intervals of three years.

The General Assembly is to review current trends in research, present new discoveries and make plans for future research work or for specific projects, especially where it seems desirable to arrange for cooperation on an international scale.

General Assembly on selected topics are usually organized by two or more Commissions. Most radio scientists attend the General Assembly and Scientific Symposium solely for these scientific activities, which are open to anyone interested in radio science, whether or not connected with a Member Committee of the Union.

General Assemblies can be purchased from the URSI Secretariat, but may be downloaded free of charge.

The procedure on how to prepare a proposal to host and organize an URSI General Assembly and Scientific Symposium can be downloaded [here](#) (version 21 May 2011)

THE URSI NEWSLETTER

The [URSI Newsletter](#) is part of the plan to increase the visibility of URSI, and to stimulate the exchange of information amongst the URSI scientists. The Newsletter is published bi-monthly and distributed by e-mail. It will allow more informal communication with URSI scientists.

THE RADIO SCIENCE BULLETIN

The [Radio Science Bulletin](#) (published quarterly in March, June, September and December) contains scientific articles covering the fields of interest of the ten scientific commissions of URSI. Emphasis lies on non-specialised contributions that are oriented towards the radio scientist community.

The Radio Science Bulletin also contains items of information concerning the activities of URSI, such as notices relating to past and future scientific symposia, announcements about the activities of the Board of Officers and the Scientific Commissions and the Working Groups of URSI, reports on relevant decisions of other ICSU organisations, as well as book reviews, and historical articles of interest to radio scientists.

Lists of the names and addresses of the Officers of URSI appear each year in the December issue. About 2700 copies are sent to URSI Radioscientists and the Member Committees of the Union. The Radio Science Bulletin is available from the URSI Secretariat.

URSI WHITE PAPERS

URSI publishes also [white papers](#) on a variety of radio science related subjects that cover the scopes of interests from the various commissions.

URSI-sponsored Journals

THE RADIO SCIENCE JOURNAL

The [Radio Science Journal](#), sponsored by URSI and published by the American Geophysical Union, contains original articles on all aspects of electromagnetic phenomena related to physical problems. It covers the propagation through and interaction of electromagnetic waves with geophysical media, biological media, plasmas, and man-made structures.

JOURNAL OF ATMOSPHERIC AND TERRESTRIAL PHYSICS

The [Journal of Atmospheric and Terrestrial Physics](#) was founded by Sir Edward Appleton who was President of URSI for some 20 years. In consequence, despite its general name, papers are mainly in radio science in the fields of URSI Commissions G and H.

Standing Publications Committee

URSI Young Scientists

The Young Scientist Awards are presented at the General Assemblies of URSI to recognize an international group of individuals who have made innovative contributions and discoveries in multidiscipline research related to electromagnetic fields and waves. The General Assemblies of URSI are held every three years to review current research trends, present new discoveries and make plans for future research and special projects in all areas of radio science, especially where international cooperation is desirable.

- **Standing Committee on Young Scientists**

Chair: Prof. K. Schlegel

Members:

- Prof. D. Erricolo, USA
- Dr. M.K. Goel, India
- Mr. J. Hamelin, France
- Prof. E.V. Jull, Canada
